TRIGGER SPRAYERS

TS2

Spray system

**PRECISION IN
EVERY POSITION**

The TS2 trigger offers a pre-compression system which ensures uniform and drip-free atomization in every position and even up-side down, reaching the most inaccessible and difficult areas.

DOUBLE FEATURE

Conventional pre-compressed configuration.
Multidirectional pre-compressed configuration.

SHELF IMPACT

Modern and innovative design.
Highly ergonomic shape.
Perfect integration with bottle design.
Wide range of color options.

UNIQUE PERFORMANCE

Multidirectional dispensing, even up-side down. High quality pre-compression for a constant atomization independently of the actuation force. Drip free and on-off twist nozzle with spray or foaming/mesh performances of 0,85 ml dose.

DEGASSING SYSTEM

The ePTFE GORE™ Membrane prevents liquid penetration while allowing gas exchange in both directions and equalizing pressure, even after liquid contact.

HIGH QUALITY STANDARD

High quality standard is ensured through SPC and 100% automatic Q.C. on line.

EASY CAPPING

The snap-on simplifies and speeds the capping for a cost effective filling operation. The bayonet twist-off makes easier and quicker the refill operation.

SPRAY OR FOAMING NOZZLES

Fine spray and two different foaming performances: conventional or creamy. Both spray and foaming nozzles are twist-off nozzles.
