TRIGGER SPRAYERS

TS3 SNAP ON

Spray system

SIMPLY EVOLUTION

The TS3 is the natural evolution of GUALA triggers.

The TS3 trigger is the reward of a continuous technical research directed towards a high attention to environmental impact and the optimization of quality-price ratio.

GUALA innovation created a performing trigger made by a reduced number of components, all in plastic.

SHELF IMPACT

Different and exclusive aesthetics. Back support option improves ergonomics. Wide range of colour options.

HIGH QUALITY STANDARD

High quality standard is ensured through SPC and 100% automatic Q.C. on line.

UNIQUE FITTING ONTO THE BOTTLE

Snap On feature simplifies and speeds the capping for a cost effective filling operation. Bayonet twist-off makes easier and quicker refill operation.

CRP CHILD RESISTANT PACKAGING

TS3 Snap On is certified in compliance with International ISO 8317:2005. TS3 Snap On CRP incorporates:
 - a nozzle block, an extended "double action" mode of operation in order to prevent children opening,
 - non-removable bottle interface to avoid direct access to contained formulations.

PROVEN TECHNOLOGY: OVER 2 BILLION SOLD

GUALA introduced bellow technology into a trigger sprayer. 100% on-line tests with fluidic controls and high speed cameras. Special compound of Polyolephin. 60% dose rise with no weight or volume increase of the trigger up to 1,3 ml.

SPRAY AND FOAMING NOZZLE

TS3 offers a wide range of nozzles options: two fine sprays, three different foams, conventional, creamy and extra creamy. All TS3 nozzles are twist-off nozzles and are available in the CRP version.
